WHAT YOU'LL LEARN

- Explain in general terms how large language models work, and name their structural error types.
- Judge which tasks in a case file lend themselves to AI support, and justify that choice.
- Turn a legal information need into a reproducible instruction and verify the output systematically.
- Test your own use of AI against the duty of confidentiality, the Rules of Conduct for the Bar, and the AI Act.

COURSE CONTENT

Module 1 — How the technology works
What a large language model does, and the error types that follow from the way it is built.

Module 2 — AI in a case file
Which tasks lend themselves to it, how to write a reproducible instruction, and how to verify the output against a fixed protocol.

Module 3 — Where the line is
The duty of confidentiality, the core values and Rules of Conduct, the AI Act and the GDPR.

Module 4 — Final case
You apply the material to your own practice and are assessed against a rubric, with written feedback.
